

IHC-MM-101
21 August 1969

MEMORANDUM FOR: [REDACTED]

SUBJECT: Update of CIA Production Figures in Chairman,
PFIAB memo of July 20, 1967

1. Most of the information I have gathered on this item has been relayed in conversations

- a. The Clifford statistic (p. 2, para 2, line 12) is derived from the Knox panel report.
- b. The Knox panel report is not available. A summary is available. On page 6, lines 6-10 of the summary, the same statistic is repeated plus wording that indicates that the data relates to "current intelligence production at CIA" vs. "CIA production."
- c. The Knox panel paper statistic was derived--apparently--from [REDACTED] paper, Controlling Intelligence Information, September 1966, page 6 and referenced chart.
- d. These statistics came from [REDACTED]--presently on leave.
- e. A conversation with [REDACTED] indicates that the [REDACTED] statistics were taken from a yearly, administrative report which sets forth estimated production of impressions in the 7th floor print shop. The estimates are shown in the form of a one month average which presumably is simply multiplied by 12 to derive an estimate for a Fiscal Year. Since the Clifford memo, the Knox summary, and the [REDACTED] report do not indicate FY or CY, the figures below may not correspond to theirs.

- [REDACTED]
- g. The [REDACTED] report stops at 1966. Estimates for the following three years were obtained from [REDACTED]

FOR INTERNAL USE ONLY

- 2 -

25X1A

25X1A

- h. [redacted] told me that a check on actual production of impressions for CY-65 indicated a figure of approximately [redacted]. He also commented that either [redacted] seemed a poor estimate for total CIA production.

- i. A later investigation by [redacted] yielded actual figures of number of impressions for the 7th floor plant as follows:

25X1A
25X1A

2. [redacted] also commented that the total number of impressions done by Printing Services Division (including the 7th floor plant) is approximately [redacted], lending substance to our feeling that CIA turns out a lot more paper than the Clifford memo indicates.
